Dear Prof. Debanjan Mahata :

Eight weeks ago, you agreed to review the manuscript Using Stigmergy to Identify Event-Specific Social Discussion Topics TCSS-2016-07-0039. At the IEEE Transactions on Computational Social Systems we ask that reviewers complete and submit their reviews within 8 weeks after agreeing to do the review. This is to provide authors with a timely decision, which we think all authors appreciate.

We know you are very busy, but could you kindly complete your review within the very near future and submit it to the Manuscript Central website at https://mc.manuscriptcentral.com/tcss so that we may provide the author with a review decision? Please let me know if you need any assistance completing your review. We would appreciate you copying the Associate Editor on any response on the status. Please let us know if there will be a problem getting the review done or if you can no longer provide a review.

Thanks for your time, help, and consideration. We look forward to receiving your review.

Sincerely,

Selina Cajolais
Editorial Assistant
